

Application Requirements

To be considered for Skyworx membership your company must complete the Application. Please note that the Skyworx Application requires submission of an executive summary of your business plan, which must include information on how your company meets the requirements for admission.

Below are the requirements for admission to the Skyworx Innovation Xchange:

- Must agree to credit and background checks.
- Adequate financial resources to remain in business for at least six (6) months.
- Once in the program, companies meet with Skyworx staff and/or mentors to determine benchmarking events they hope to complete in the first six months. Skyworx representatives assist the company in determining the needed resources to achieve their objectives and work with them to meet those goals. The companies continue to meet with representatives at least biannually to review past and future goals to ensure they meet their objectives.
- The company must submit to open book accounting during their tenancy in the program. All information is strictly confidential, but Skyworx representatives need to be able to review the financials of the company with company personnel to assist in their growth and strategic planning.
- Companies all meet quarterly for a one-hour tenant meeting. These meetings give clients a chance to network and have professionals from the community provide short presentations on services and opportunities that may be of interest to client companies.
- Must be aerospace/aviation focused and a good fit for the resources available within the Skyworx program to meet the needs of your company.
- No legal claims or lawsuits pending against the business.
- The potential for company growth and job creation.
- Plans to locate on Airport property or within the region upon graduation.
